

I CAG currently manufactures the following types of machines:

1. The pocket machine type CD-55.
2. The pocket machine type CD-57,
2a. The tapereader attachment RT/CD for the CD-57.
- 3 The hand machine type C-52.
4. The hand machine types CX-52a & CX-52b.
4a. The tapereader attachment RT/CX for the CX-52a.
5. The electric drive type B-52 for the C-52 & CX-52.
6. The teleciphering machines of the T-55 series: types TC, TY, TL, TLE, ^{TCE}TCLE, TYLE & TLZ.
7. The randomtape generators of the ZG-series: ZG-543, ZGX-542 & ZG-57.
8. The keytape numerator type MN-56.
9. The electronic offline tape processor type RTE-59.

II. In preparation for manufacture:

10. The electronic offline/online tape processor TRTE-59.
11. The rotor machine type HR-61.
12. The rotor machine type HX-62.
13. The tapereader/perforator combination PE-61.
14. The new series teleciphering machines T-55a.
15. The radio emitter/receiver, type VFS-57.

III. Diverse projects:

16. An offline mixer type PLE
17. A high speed offline mixer type FPLE.
18. An electronic key-programming device type PRG-62.

Please advise, if you desire data on any of the above.
